- *Sukre*

Sukre includes several antioxidants that promote health. Antioxidants are substances that safeguard cells from oxidative stress and free radicals. In a meta-analysis of five studies, sukre

supplements were significantly more effective than placebos in reducing mild to severe depression symptoms.

- *TeaCrine*

Owing to its many health advantages, TeaCrine has attracted considerable research study. It has the ability to stimulate dopaminergic receptors D1 and D2. This will stimulate an increase inside the body's production of dopamine. It has been shown that dopamine enhances energy levels, improves mood, and boosts cognitive ability.

- *Cinchona Bark*

Cinnamon contains several antioxidants and other beneficial compounds. Cinnamon decreases the amount of sugar in the blood and provides better blood sugar control by increasing insulin sensitivity. It may protect prevent heart disease and lower inflammation, according to certain research.

- *Green Tea*

Green tea may benefit diabetic people in controlling their levels of sugar in their blood. Current medical study indicates that drinking green tea is associated with lower fasting glucose, A1C, and insulin levels, which are indications of diabetic health.

- *Gymnema*

The herb *Gymnema sylvestre* may help battle sugar cravings and lower blood sugar levels. The plant may also have a

beneficial effect on the treatment of diabetes, as it may stimulate insulin production and the regeneration of pancreatic islet cells, resulting in a decrease in blood sugar levels.
